

LoFric Sense - female users

LoFric® Sense™ single use, hydrophilic urinary catheter with salt solution for activation.

For short and long term bladder management with intermittent urinary catheterization.

LoFric catheters are for prescription use only.

Ensure to follow the advice and training on the catheterization procedure given by your Healthcare Professional, before use.

Please refer to instructions for use included in the package, for important information and complete instructions.

Contact your prescriber if you experience difficulties.

Instructions for use

1. Wash your hands thoroughly with soap and water.
2. Press to release the salt solution and the catheter is ready to use.
3. Pull the tab up to open.
4. OPTIONAL: Use the adhesive tab on the reverse side to attach the product to a dry, clean surface.
5. Hold flap in place and take out the catheter.
6. Spread the labia and locate the urethra just above the vaginal opening. With the other hand, insert the catheter slowly into the urethra.
7. When urine begins to flow, insert the catheter slightly more to ensure both eyelets are inside the bladder.
8. When the urine flow stops, slowly withdraw the catheter a little bit. If urine starts to flow again, wait until it has stopped to ensure complete bladder emptying. Then remove the catheter completely.
9. Put the catheter back in the package, the outer packaging doubles as a hygienic and discreet disposal pouch. Dispose appropriately (local regulations may vary).
